Every day many people are killed when they are crossing the road. Most of them are old people. They are often killed because they can't see or hear very well. Children are often killed because they are not careful. They forget to look and listen before they cross the road. Cars, trucks and buses can't stop very quickly. If a car is going very fast, it will have traveled

many miles before it stops. People don't always understand this. They think a car stops in a few meters. But we must know if a car is traveling faster, then it takes longer to stop. The only safe way to cross the road is to look both ways, right and left. Then if the road is clear, it's safe to cross. The correct way to cross the road is to walk quickly. It's not safe to run. If people run across the road, they may fall down.
